## New Products and Services for Your Customers!

Metal Sales IMPACT program brings you a powerful, free software tool to allow you to sit down with your customers and help them design their next cold-formed bolt-up steel building from the ground up. It's an incredible way to sell – every fastener, panel and door — every single item on the bill of materials. There's never been a better, faster and more appreciated way to help your customers than by saving them all the problems and inconvenience of designing and erecting a custom building from scratch. From engineered foundation designs to steel supply at the job site, IMPACT has it all covered.

## Why Cold-Formed Steel Buildings?

A cold-formed steel building is any building constructed with cold-formed steel and CEE sections that are bolted or screwed together to form clear span frames, columns and rafters. No welding.

### Advantages of Cold-Formed Steel

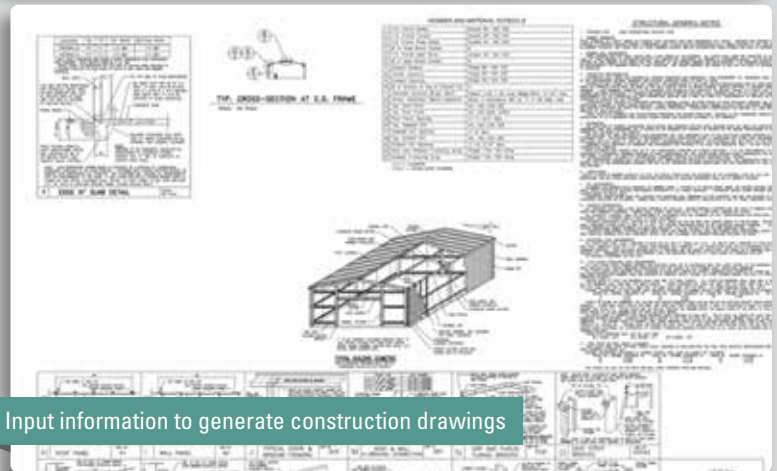

- High strength-to-weight ratio
- Non-combustibility
- Termite resistant
- Ease of construction

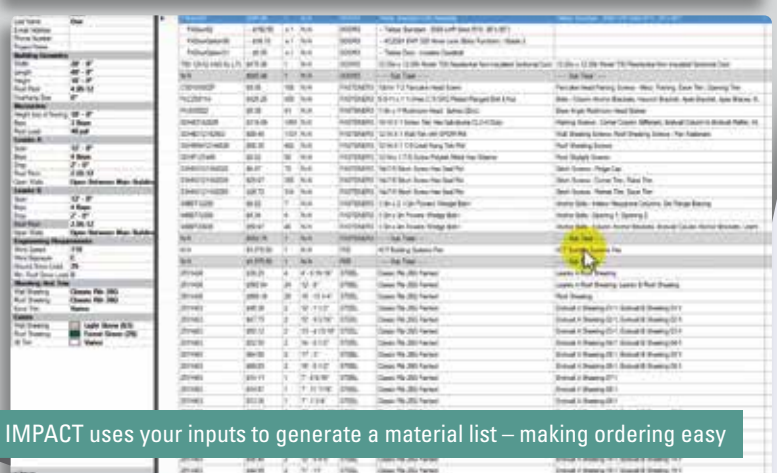

Getting started with IMPACT is easy

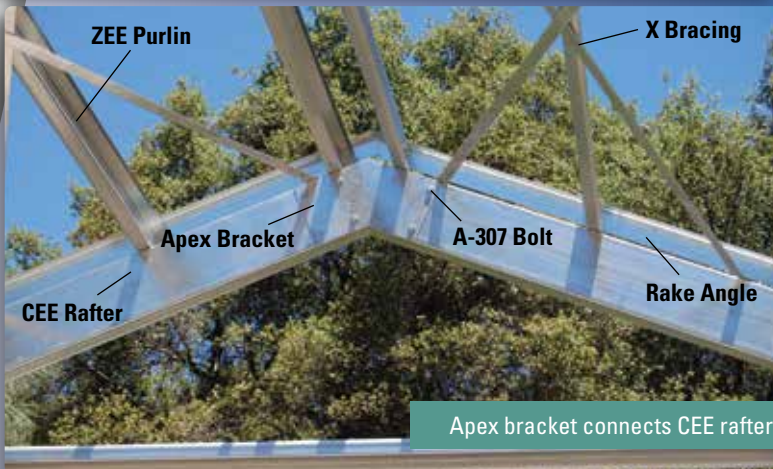

After minutes, have a building concept to share with customers

Input information to generate construction drawings

IMPACT uses your inputs to generate a material list – making ordering easy

Find out how easy it is to instantly provide your customers with a design/build cold-formed steel building, cost estimate, construction contract, blueprints and more.

## The Software

- Intuitive, easy to use software – no architectural skills required
- 3-D design using the most popular building types
- Adjusts to local building codes
- Calculates all material and dimensions required
- Generates construction permit drawings with foundation design included
- Creates a cost estimate and generates a customer contract

## The Cold-Formed Steel Building

- Bolt-up, pre-punched G90 galvanized building frame; no welding required
- Spans 60' clear or 120' posted by any length
- Metal Sales supplied purlins and girts, rafters, columns, brackets, bolts and fasteners
- Recommended suppliers for insulation, entry doors and overhead doors
- Wide range of roof and wall panels in 29 ga and 26 ga
- Roof slopes: 2.55:12 and 4.85:12
- 45 year paint warranty

## The Program

- Offer design/build bolt-up cold-formed buildings with no investment required
- Design flexibility to include partial and full mezzanines with gambrel designs
- Stamped erection drawings returned as quickly as 10 working days
- Installation videos available
- Training and support provided on the software
- Installation manuals available online for each building type

## Get Started

1. Visit [metalsales.us.com/IMPACT](http://metalsales.us.com/IMPACT) to view a video demonstration of the IMPACT software
2. Register for the complimentary software
3. Start designing

# Sustainability of Steel Buildings

- Steel components are 100% recyclable so job site trash handling costs may be reduced
- Steel contains a minimum of 30% recycled content
- Cold-formed steel components are impervious to termite and insect infestation and resist mold growth
- Steel is non-combustible. Cold-formed steel buildings may qualify for insurance premium discounts
